PROFESSIONAL SUMMARY

Software Development Engineer with 3+ years of experience in distributed systems, microservices and mobile application development, performance optimization, and supporting peak traffic during flagship events.

PROFESSIONAL EXPERIENCE

Samsung Chennai, India
Software Development Engineer *Jul 2023 – Present*

- Built an automated app performance analysis system to capture page, flow, and rendering metrics, detect regressions, generate AI-assisted insights, and create Jira tickets for critical issues; contributed to **50% reduction in screen lag** and enabled release-over-release comparisons.
- Optimized critical APIs, reducing response times by 20% and improving application performance.
- Built an in-memory API caching layer for the shop app with **request deduplication** and **concurrent in-flight request coalescing**, reducing redundant network calls and improving app responsiveness.
- Led Samsung Shop app rollouts across **USA, Japan, Turkey, Canada, Australia, Saudi Arabia, and Israel**, coordinating market-specific localization and release readiness with multi language support.

Gallabox Chennai, India
Software Developer Intern *Feb 2023 – Jun 2023*

- Developed a WhatsApp-based appointment booking and queue management system with backend services in **Node.js**, Redis and RabbitMQ asynchronous job processing and supporting bursty traffic

Google Bangalore, India
Software Developer Intern *May 2022 – Jul 2022*

- Developed a health monitoring solution for private cloud infrastructure, enabling diagnostics and detection of infrastructure failures.
- Built Angular dashboards to =visualize the metrics.

SELECTED PROJECTS

- **DailyFlow:** Built a productivity app for managing daily and recurring tasks, tracking habits and completion streaks, and writing journal entries; added overdue task carryover, progress visualizations, and JSON backup and restore with protected journal entries.
- **CricInfo (macOS):** Built a real-time menu bar application displaying live cricket scores, match statistics, and player data; developed backend APIs and optimized refresh logic for timely updates.
- **BitGuard:** Developed an encrypted credential vault with biometric authentication and secure access controls.
- **Xpense:** Built a cross-platform expense tracker with React Native and Firebase, including real-time data synchronization.
- **Link Prediction in Social Networks:** Applied machine learning models to predict edge formation in dynamic graphs.

TECHNICAL SKILLS

Languages: C++, JavaScript, Dart, SQL

Frameworks / Platforms: Flutter, Node.js, React, Next.js, React Native, Angular, Firebase

Databases / Infrastructure: Redis, MongoDB, SQL Databases, RabbitMQ, AWS S3

Engineering: Data Structures and Algorithms, Distributed Systems, microservices Asynchronous Processing, Job Queues, Performance Monitoring, Observability, Mobile Performance Optimization

EDUCATION

SSN College of Engineering, Anna University Tamil Nadu, India
B.Tech, Information Technology

ACHIEVEMENTS:

Winner – Samsung Electronics Hackathon 2025; Department Rank Holder (2021–2022); Solved 450+ LeetCode and GeeksforGeeks problems; Winner – WebITOut & Websitica (INVENTE 5.0).
